

APPENDIX F

Waters Stocked With Trout by the New Jersey Division of Fish and Wildlife

General Explanation

The New Jersey Division of Fish and Wildlife (NJDFW) annually stocks trout in waters throughout the state. Trout-stocked waters are designated in the Fish Code (N.J.A.C. 23:25-6) which is adopted each year by the New Jersey Fish and Game Council, pursuant to the authority of N.J.S.A. 13:1B-29 et seq. and N.J.S.A. 23:1-1 et seq. The list of trout-stocked waters may change slightly from year to year in response to program changes. A copy of the Fish Code may be obtained from the NJDFW and is also available in summary form in the Fish & Wildlife Digest (freshwater fishing edition) that is available wherever fishing licenses are sold (i.e. sporting goods stores, etc).

In the Fish Code, designated trout-stocked waters are listed by county. Individual names (and occasionally the spelling) of trout-stocked waters may follow local tradition. These names may not appear as such on U.S.G.S. quadrangles, county or state maps, etc. and further, may not be identified in the Surface Water Classification Tables (promulgated under N.J.A.C. 7:9B-1.15). This has made it difficult for regulators, consultants, and others to determine if a water is trout-stocked and in need of further consideration in accordance with New Jersey Department of Environmental Protection regulations. The list below was developed as a companion to another NJDFW document entitled "Classification of N.J. Trout Waters as Related to Their Suitability for Trout". In both of these documents, the listed waters are organized by watershed (rather than by county) and for consistency the nomenclature found in the Surface Water Classification Tables is used.

The season(s) during which trout are stocked is indicated by the following letter(s) which precede a listed water.

- S Spring – Stocking occurs during a 10 week period, generally beginning in mid-March and continuing through May.
- F Fall – Stocking occurs over a 3 week period, generally commencing the second week in October.
- W Winter – Stocking occurs during one of two weeks. Generally northern waters are stocked during the week of Thanksgiving and southern waters are stocked during the first full week in January.
